

# SANGRAM LEMBE

Pune, India

☎ +91-9158416688 ✉ [sangramlembe9696@gmail.com](mailto:sangramlembe9696@gmail.com) [in](#) [Linkedin](#) [Github](#) [Portfolio](#)

## EDUCATION

**S.R.M. Institute of Science and Technology , Chennai**

**2025 - 2027**

*M.Tech - Data Engineering - CGPA - 8.39*

*Chennai, Tamilnadu*

**G.H.Raisoni College of Engineering and Management, Pune**

**2020 - 2024**

*B.Tech - Artificial Intelligence - CGPA - 8.31*

*Pune, Maharashtra*

## EXPERIENCE

**Intern at CSIR-CSIO**

**March 2026 - Present**

*Role - Computer Vision Research Intern*

*Chennai, Tamilnadu*

- Engineered a real-time CNN-Transformer hybrid model to resolve computational bottlenecks in UAV semantic segmentation, enabling high-performance pixel-wise classification on limited hardware.
- Enhanced aerial object recognition accuracy by tackling scale variations and shadow-induced ambiguities through advanced global/local feature fusion techniques.

**Intern at Flourisense**

**July 2023 - January 2024**

*Role - Python Developer*

*Pune, Maharashtra*

- Developed an Application Tracking System using Node.js and Sequelize ORM to efficiently model and manage candidate data.
- Implemented and tested scalable RESTful APIs using Postman to ensure seamless communication between the front-end and back-end systems.

## PROJECTS

**LogiCrisis — Meta PyTorch OpenEnv Hackathon Finalist** [🔗](#) |

**Apr 2026**

- Built a six-agent RL environment simulating cascading supply chain crises across India with live weather, currency, and GDELT conflict APIs — recognized as "top 0.1% of RL developers" by a Meta engineer.
- Fine-tuned Llama-3-8B using GRPO with Unsloth 4-bit QLoRA on A100, achieving emergent agent behaviors: pre-emptive cold-storage deployment, two-turn-early geopolitical alerts, and instant counter-proposals during currency shocks.
- Selected for 48-hour in-person finale in Bangalore (from 51K+ applicants) after qualifying in Round 1 with a Banking Support Agent environment for fraud dispute resolution.

**Forecasting the Psychological Well-being of Students Using ML** [🔗](#) |

**Dec 2025 - Mar 2026**

- Awarded **Gold Medal** at College Research Day for Best Research Paper from the Department of Psychology.
- Developed a predictive machine learning model utilizing PCA, PSO, and stacked ensemble techniques to forecast mental health challenges among 1,000 college students.
- Enabled proactive early identification of at-risk individuals, facilitating targeted interventions that improved student well-being, academic performance, and emotional resilience.

**AI Legal Reasoning Assistant (DeepSeek R1 and RAG)** [🔗](#) |

**Aug-Nov 2025**

- Designed a legal analysis tool using DeepSeek R1 to leverage Chain-of-Thought (CoT) reasoning for interpreting complex legal statutes.
- Built a RAG pipeline with LangChain and FAISS to retrieve context from penal codes (e.g., UDHR), reducing hallucinations and providing citation-backed legal answers via a Streamlit interface.

## Technical Skills

**Languages:** Python, C++, SQL, HTML, CSS

**ML/DL:** PyTorch, TensorFlow, Scikit-learn, LangChain, FAISS, RAG, Multi-Agent Systems, GRPO

**Tools:** Git, VS Code, PyCharm, Anaconda, HuggingFace, n8n, Jupyter, Canva

**Visualization:** Matplotlib, Plotly

## PUBLICATIONS

**Features Preserving Blurred Image Classification Using Large Language Model.** [🔗](#)

**2024**

*In IJIRSET, pp. 8474-8480. Publisher. 5 MAY 2024, Pune. DOI: X10.15680/IJIRSET.2024.1305313*

## ACHIEVEMENTS CERTIFICATIONS

- Awards:** Meta PyTorch OpenEnv Hackathon Finalist (2026); Gold Medal – Best Research Paper, SRM Research Day
- Certifications:** Fundamentals of Deep Learning (NVIDIA); The Joy of Computing Using Python (NPTEL)
